

Student Representative Report

This month some things have changed in our school. The computer lab has moved with the help of the basketball teams, and a few helpers that wanted to avoid Saturday school. The kids that helped do this to avoid Saturday school feel that it was “ a way better way to do time”. So I think the school should adopt this option into policy.

The basketball teams had a tournament...and of course the Unalaska boys won. The Girls gave it all they got and came up just a little short. From what I here the teams are going through a rough period because of the weather and grades.

Weather has caused problems the past couple weeks when it comes to attendance. The students would like to know when is the weather too bad to stay in school.

The ACT test was given again this month. Usually it's only given once a year. This does not make sense to many of the juniors and seniors, they believe it should be given as often as SAT tests.

I talked to some of the smaller children (my brother) about the swim lessons. He said that he can't wait till they start and he thinks they are a good idea. I also talked to the swim aide (Carly Barron), and she said that she doesn't mind giving them and even though the children are a handful it is still fun.

The last issue I'm going to bring up is the budget. I think you ask the children what we need, some of them would have some good money saving tips, or they might have some input of what the school needs. We should keep them updated on these activities, and I know that's my jobs but I can't talk to every student. Anyway....that's what happening to the students.
