

## **Student Representative's Report**

May 2003

Junie Magpantay

The year is winding down, and students are becoming concerned about the next school year. The main issue that is being talked about, aside from prom, is the new rule concerning the 0.5 Physical Education credit.

According to the handout given to me by Mr. Sanborn, a student will be able to attain 0.5 Physical Education credit if the student completes three seasons in any varsity sport or sports. Students are very excited about this new rule, and hope that it can be enforced in the upcoming school year.

The only concern was fairness. In able to make this fair to students who have already attained the half credit for P.E., it is suggested that any student who has completed the 0.5 credit prior to this school year (2002-2003), can turn that credit into an elective if they complete 3 seasons in any varsity sport/s before their scheduled graduation date.

Since the student handbook will also be up for revisions this month, the students would like the board to remember that music in the classroom promotes multitasking and thus encourages mental advancement.

Also, students are thinking that the hat rule be reconsidered, or a little more lenient, allowing students to wear hats when not in the classroom. They believe that the time between classes is a relaxing time, when students can be themselves, expressing themselves through fashion. They know that they are not allowed to wear hats in the classroom, because that is the time to learn.
